**Repair Manual** Dundurn  
Because life is more  
brilliant and more brutal  
than any of us imagined.  
Even before her mother's  
death, Lubba James was  
different. Now she's  
worse. She drowns herself  
in fairytales. Lets her  
imagination run away with  
her. Doesn't know how to  
mourn appropriately.  
Driven mad or driven to  
escape, Lubba isn't sure.  
But she knows she has to

get away from her  
insufferable sister and  
overwhelmed father.  
Lubba begins her own  
quest to discover what  
normal looks like. And like  
reality, it's not very  
pretty. A burned-out cop  
and his hair-trigger sniffer  
dog. A homicide victim  
trapped alive. What's left  
of a woman who lost her  
child. Lubba's path leads  
to them all, and as she  
travels deeper, sees  
more, she realizes that  
life can be more wicked  
than any witch, and richer  
than happily-ever-after. In  
the end, Lubba must  
decide not what's normal,  
but whether or not she  
cares.

As U.S. and Canadian  
automakers and dealers  
face bankruptcy and  
Toyota battles  
unprecedented quality-  
control problems, Lemon-  
Aid guides steer the  
confused and anxious  
buyer through the  
economic meltdown  
unlike any other car-and-  
truck books on the  
market. Phil Edmonston,  
Canada's automotive "Dr.

Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz -- rich cars, poor quality. There's only one Saturn you should buy. Toyota -- enough apologies: "when you mess up, 'fess up."

2007-2018 Dundurn

In the international bestseller *The Power of Habit*, Pulitzer Prize-winning journalist Charles Duhigg explained why we do what we do. In *Smarter Faster Better*, he applies the same relentless curiosity, rigorous reporting and rich storytelling to explain how we can get better at the things we do. The result is a groundbreaking exploration of the science of productivity. A group of data scientists at Google embark on a four-year study of how the best teams function, and find that how a group interacts is much more important than who is in the group. A Marine Corps general, faced with low morale among recruits, reimagines boot camp - and discovers that instilling a 'bias toward action' can turn even the most directionless teenagers into self-motivating achievers. The filmmakers behind Disney's *Frozen* are on the brink of catastrophe - until they shake up their team in just the right way, spurring a creative breakthrough that leads to one of the highest-

grossing movies of all time. What do these people have in common? They know that productivity relies on making certain choices. The way we frame our daily decisions; the big ambitions we embrace and the easy goals we ignore; the cultures we establish as leaders to drive innovation: these are the things that separate the merely busy from the genuinely productive. At the core of Smarter Faster Better are eight key concepts - from motivation and goal-setting to focus and decision-making - that explain why some people and companies get so much done. Drawing on the latest findings in neuroscience, psychology and behavioural economics - as well as the experiences of CEOs, educational reformers, four-star generals, airplane pilots and Broadway songwriters - this painstakingly researched book explains that the most productive people, companies and organizations don't merely act differently. They view the world, and their choices, in profoundly different ways.
