Interpreting the Bible Peachpit Press

This book is an update of a successful first edition that has been extremely well received by the experts in the chemical process industries. The authors explain both the theory and the practice of optimization, with the focus on the techniques and software that offer the most potential for success and give reliable results. Applications case studies in optimization are presented with new

examples taken from the areas of microelectronics processing and molecular modeling. Ample references are cited for those who wish to explore the theoretical concepts in more detail.

Embedded Linux Development Using

Yocto Project Cookbook John Wiley & Sons

Over 79 hands-on recipes for professional embedded Linux developers to optimize and boost their Yocto Project know-how Key Features Optimize your Yocto setup to speed up development and debug build issues Use what is quickly becoming the standard embedded Linux product builder framework—the Yocto Project Recipe-

based implementation of best practices to optimize your Linux system

Book Description The Yocto Project has become the de facto distribution build framework for reliable and robust embedded systems with a reduced time to market. You'll get started by working on a build system where you set up Yocto, create a build directory, and learn how to debug it. Then, you'll explore everything about the BSP layer, from creating a custom layer to debugging device tree issues. In addition to this, you'll learn how to add a new software layer, packages, data, scripts, and configuration files to your system. You will then cover topics based on application development, such as using the Software Development Kit and how to use the Yocto project in various

development environments. Toward the end, you will learn how to debug, trace, and profile a running system. This second edition has been updated to include new content based on the latest Yocto release. What you will learn

- Optimize your Yocto Project setup to speed up development and debug build issues
- Use Docker containers to build Yocto Project-based systems
- Take advantage of the user-friendly Toaster web interface to the Yocto Project build system
- Build and debug the Linux kernel and its device trees
- Customize your root filesystem with already-supported and new Yocto packages
- Optimize your production systems by reducing the size of both the Linux kernel and root filesystems
- Explore the mechanisms to increase the root filesystem security

Understand the open source licensing requirements and how to comply with them when cohabiting with proprietary programs Create recipes, and build and run applications in C, C++, Python, Node.js, and Java Who this book is for If you are an embedded Linux developer with the basic knowledge of Yocto Project, this book is an ideal way to broaden your knowledge with recipes for embedded development.

"We know we need to improve our traditional school system, both public and private. But how? More homework? Better-qualified teachers? Longer school days or school years? More testing? More funding? No, no, no, no, and no. Montessori Madness! explains why the

incremental steps politicians and administrators continue to propose are incremental steps politicians and administrators continue to propose are incremental steps in the wrong direction. The entire system must be turned on its head. This book ask parents to take a look--one thirty-minute observation--at a Montessori school. Your picture of what educations should look like will never be the same"--Back cover.

Approaching the settlement of our Moon

from a practical perspective, this book is well suited for space program planners. It addresses a variety of human factor topics involved in colonizing Earth's Moon, including: history, philosophy, science, engineering, agriculture, medicine, politics & policy, sociology, and anthropology. Each chapter identifies the complex, interdisciplinary issues of the human factor that arise in the early phases of settlement on the Moon. Besides practical issues, there is some emphasis placed on preserving, protecting, and experiencing the lunar environment across a broad range of occupations, from scientists to soldiers and engineers to construction workers. The book identifies utilitarian and visionary factors that shape human lives on the Moon. It offers recommendations

for program planners in the government and commercial sectors and serves as a helpful resource for academic researchers. Together, the coauthors ask and attempt to answer: "How will lunar society be different?"

This Second Edition of Diana Ridley's bestselling guide to the literature review outlines practical strategies for reading and note taking, and guides the reader on how to conduct a systematic search of the available literature, and uses cases and examples throughout to demonstrate best practice in writing and presenting the review. New to this edition are examples drawn from a wide range of disciplines, a new chapter on conducting a systematic review, increased coverage of issues of evaluating quality and conducting reviews using online sources and online literature and enhanced guidance in dealing with copyright and permissions

issues.

This volume explores the relationship between language and political power in the Age of Extremes. Topics include leadership cults under Stalin and Mussolini, depictions of enemies, secret diary-writing under Nazism, and the defence strategies of Soviet party members and Gestapo prisoners.

A History of Literary Criticism Springer
Science & Business Media

This extraordinary book is the only authentic document of its kind. Beginning with a detailed and lucid exposition of the political background of India from Ajatasatru to Mahapadma nanda, it goes on to trace the sources of the Second Buddhist Council, to locate

with unerring exactitude the disruptive forces in the Sangha and, in the fourth chapter, to classify the Sects. In the chapters that follow, the learned author deals with the Mahasanghikas, doctrines of Group II-V Schools. In every chapter, if not on every page, current but ill-founded assumptions are rejected and their illogicalities exposed to the reader's view. The eager student is given a panoramic view of the doctrinal developments that took place during the period concerned by this book. With irrefutable arguments and considerable ratiocinative skill does the writer conclude that the Mahasanghikas were evidently the earliest school of the Hinayanists to show a tendency towards conceiving Buddha docetically.

A Study Edition, with Introduction, Commentary, Discussion Questions, Glossary, and a fully linked Index. St. Teresa of Avila is an unsurpassed teacher of Christian prayer and spirituality, and in *The Way of Perfection* she is at her best. Now, with the help of this study edition, everyone can enjoy the benefits of her wisdom. In *The Way of Perfection*, St. Teresa gives practical counsels and advice on prayer, destined originally for the few nuns who embraced the reformed Carmelite life she established. As a handbook for spiritual formation, it presented them with the basic Christian spirituality undergirding their Constitutions and Rule. Over the centuries, the book's appeal has reached far beyond the walls

of Carmelite monasteries, and *The Way of Perfection* has become a spiritual classic. More and more today, Teresa's instructions speak to all those interested in prayer, providing them with basic guidelines for praying and showing how to avoid potential pitfalls. But as the readership and interest grow, so does the need for some help in working with this sixteenth-century text. The principles and teachings in Teresa's book, first presented within the limited horizons of her own situation, clearly lend themselves to broader applications, and can work well in all walks of life. This study edition—with its introduction, commentary, notes, discussion questions, glossary, and a fully linked Index—provides what is needed to assist contemporary readers in making these

applications and delving more deeply into the text's spiritual riches.

Lectures To My Students Wiley-Blackwell

Ancient Greeks and Romans often turned to magic to achieve personal goals. Magical rites were seen as a route for direct access to the gods, for material gains as well as spiritual satisfaction. In this survey of magical beliefs and practices from the sixth century B.C.E. through late antiquity, Fritz Graf sheds new light on ancient religion. Graf

explores the important types of magic in Greco-Roman antiquity, describing rites and explaining the theory behind them. And he characterizes the ancient magician: his training and initiation, social status, and presumed connections with the divine world. With trenchant analysis of underlying conceptions and vivid account of illustrative cases, Graf gives a full picture of the practice of magic and its implications. He concludes with an evaluation of the relation of magic to religion.

NEW YORK TIMES BESTSELLER • “A

fascinating look at how consumers perceive logos, ads, commercials, brands, and products.”—Time How much do we know about why we buy? What truly influences our decisions in today’s message-cluttered world? In *Buyology*, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge experiment that peered inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos,

commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores: • Does sex actually sell? • Does subliminal advertising still surround us? • Can “cool” brands trigger our mating instincts? • Can our other senses—smell, touch, and sound—be aroused when we see a product? Buyology is a fascinating and shocking journey into the mind of today's consumer that will captivate anyone who's been seduced—or turned off—by marketers' relentless attempts to win our loyalty, our money, and our minds.

Political Languages in the Age of Extremes Pearson Education

This reprint of the 1969 book of the

same name is a concise, rigorous, yet accessible, account of the fundamentals of constrained optimization theory. Many problems arising in diverse fields such as machine learning, medicine, chemical engineering, structural design, and airline scheduling can be reduced to a constrained optimization problem. This book provides readers with the fundamentals needed to study and solve such problems. Beginning with a chapter on linear inequalities and theorems of the alternative, basics of convex sets and separation theorems are then derived based on these theorems. This is followed by a chapter on convex functions that includes theorems of the alternative for such functions. These results are used in obtaining the saddlepoint optimality conditions of

nonlinear programming without differentiability assumptions.

The aim of this series is to present the contents of different streams of Indian philosophical texts to make more and more people aware about Indian philosophical thought. This multi volume work presents Indian thought, citing experts on the point that seem debatable. So far, 9 volumes have been brought out. Volume one provides a list of sources which are surveyed in the subsequent volumes as well as provides a guide to secondary literature for

further study of Indian philosophy.

Volume 2 provides a detailed resume of current knowledge about the classical Indian philosophical system of Nyaya-Vaisesika in its earlier stages. Volume 3 summarizes early Advaita Vedanta upon Sankara's pupils. Volume 4 discusses the history of the system and its philosophical overall. This present volume attempts to cover the development of Buddhist philosophical notions from the time of Vasubandhu and his critic Samghabhadra. It is a glorious period in Indian history, the time of the Gupta kings."
