longest sustained firefight involving American troops since the Vietnam War. On October 3, 1993, about a hundred elite U.S. soldiers were dropped by helicopter into the teeming market in the heart of Mogadishu, Somalia. Their mission was to abduct two top lieutenants of a Somali warlord and return to base. It was supposed to take an hour. Instead, they found

themselves pinned down through a long and terrible night fighting against thousands of heavily armed Somalis. The following morning, eighteen Americans were dead and more than seventy had been badly wounded. Drawing on interviews from both sides, army records, audiotapes, and videos (some of the material is still classified), Bowden's minute-by-minute narrative is

one of the most exciting accounts of modern combat ever written—a riveting story that captures the heroism, courage, and brutality of battle.

fast-paced world in which developing fast and efficient buy-and-sell order processing systems and order executing (clearing and settling) systems is of primary importance. The orders involved come from an ever-changing network of people (traders, brokers, market makers) and technology. To prepare people to succeed in this environment, seasoned

financial technology veteran Roy Freedman presents both the technology and the finance side in this comprehensive overview of this dynamic area. He covers the broad range of topics involved in this industry-- including auction theory, databases, networked computer clusters, back-office operations, derivative securities, regulation, compliance,

bootstrap statistics, optimization, and risk management—in order to present an in-depth treatment of the current state-of-the-art in financial technology. Each chapter concludes with a list of exercises; a list of references; a list of websites for further information; and case studies.
