In this very accessible volume, Fuller investigates the great challenges facing humanity. How will humanity survive? How does automation influence individualization? How can we utilize our resources more effectively to realize our potential to end poverty in this generation? He questions the concept of specialization, calls for a design revolution of innovation, and offers advice on how to guide "spaceship earth" toward a sustainable future.

The first book by Bro. Anthony Mongelli, Jr. This is the first in a three-volume set that treats nine symbols and emblems of the first degree of Freemasonry, that of Entered Apprentice. This first volume, Book 1, discusses the circumpunct (the point-within-a-circle), the twin pillars and the Masonic apron. The section on the circumpunct is perhaps the most exhaustive treatment of this astounding symbol. Bro. Mongelli seeks after the significance that these symbols and emblems have had amongst diverse cultures across time with an eye toward how those meanings may inform our own interpretation of them. This book is extensively researched, having referenced more than 160 works. Features a revised and expanded version of the essay "Some Words to Newly Made Masons." Each chapter is thoroughly footnoted, features copious illustrations and a complete reference list.
