To Establish Certain Public Buildings Policies for the Federal Government U.S. Government Printing Office

This book argues that contemporary society in general, and public administration specifically, can benefit from more reflexive learning processes through democracy and public involvement. It identifies the most central social practices, dilemmas, and challenges for public management as well as the mechanisms needed to enact institutional change. Offering a model of reflexivity and learning in the face of public dispute, it explores phenomena such as problem solving, democratization, public learning, and uncertainty to address certain tensions in governance theory and practice. Through a range of well-sourced case studies, this book demonstrates how institutions can manage difficult situations by not only resolving the conflict but addressing the underlying problem. It uses both theoretical and practical approaches to observe the micro foundations of political behavior and its institutional underpinnings, and will be a valuable resource for public administration researchers, practitioners, and graduate students seeking empirical studies of learning processes in the public sphere.

Recent insolvency cases highlight the growing importance of cross-border insolvency matters in international transactions. In order to obtain relevant information essential for conduct in such transactions, an insolvency lawyer needs to have access to the many relevant instruments that have been introduced and implemented in recent years, but that until now have not been available in any single place. This very useful volume collects, for the second time in one source, all important international and regional legal instruments relating to insolvency of companies and consumers, as well as to corporate rescue law. The book includes international and regional conventions, model laws, EU regulations and directives, and guiding principles produced by various international bodies (such as the World Bank, the United Nations Committee on International Trade Law ('UNCITRAL'), the American Law Institute, INSOL International, and INSOL Europe), and international and European restatements of insolvency law by scholars. In addition to reproducing the complete texts of these instruments, the editors provide insightful commentary covering such important matters as the following: • key issues of each text; • expected amendments and revisions; and • comparative analysis of instruments. A unique resource bringing together core material in the field of cross-border insolvency law and legislation, this book will be welcomed by international insolvency practitioners worldwide.

Given the importance that spectators grant to the final moments of a motion picture, it is surprising to find so little written on how films end and how audiences interpret those closing moments. This study investigates endings in film and the lively role they play in how and why viewers make sense of movies. Relying upon contemporary literary criticism and film theory, the author analyses narrative strategies in films ranging from the classical Hollywood motion picture to the more modern European art cinema. To assist readers in understanding the various functions of endings, the films are divided into four critical categories: the "Closed Text" film, typical of classical works; the "Open Story" films; the "Open Discourse" film; and the "Open Text" film which struggles to defy story resolution. Detailed textual analysis of sample films reveal how all of the devices of filmic narration - from "mise-en-scene" to soundtracks - direct a viewer's perception, comprehension and interpretation of closure in films. Among the sample films that are featured as test cases for studying endings are "The Quiet Man" (Ford, 1950), "The 400 Blows" (Truffaut, 1959), "Weekend" (Godard, 1967), "Tout va bien" (Godard, 1972), and "Earth" (Dovzhenko, 1930). To round out his informative study of endings in films, Neupert also examines a host of diverse titles, including "Do the Right Thing" (Lee, 1989), "Open City" (Rossellini, 1945) and "The Graduate" (Nichols, 1967).

At the heart of this important new book is the tension between

literacy and the open acknowledgement of discrepancies within social and linguistic fields on the one hand, and what Sussman terms the resolving function, the utopian picture of harmony depicted by the state and large organizations, on the other. After discussing some examples of the resolving function--Barthes's notion of the myth, Kundera's fictional treatment of kitsch, and contemporary television--Sussman draws on a line of theoretical inquiry extending from Saussure to Derrida in order to put forth a differential model of literacy in which the skills necessary to participate productively in culture are more disjunctive than associative in nature. Awareness of the discrepancies set into play by language is necessary, he argues, for both the individual and the society to understand the complex and sometimes contradictory web of socioeconomic, political, and semiological relations in which they are involved. Combining literary theory with close textual readings of works by Hawthorne, Melville, Wallace Stevens, Ezra Pound, William Carlos Williams, and Italo Calvino, this book is the first to explore the socio-political correlatives to literary studies--the mass media's ambivalence toward the linguistic apprehensions and skills that make them possible.

The Great Chair speaks to a single issue—why board chairs are more important than ever for effective governance. This book tackles board leadership fundamentals, such as: • How effective board chairs engage colleagues to reach consensus, • How effective chairs lead the board so the board, in turn, fosters organizational effectiveness, • The trick to ensuring a focus on the highest priorities, • And—critically—how to build and sustain trust with the CEO and within the board. With nearly four decades of experience with the good, bad, and ugly of the board universe, Brian Hayward hones in on practical ways to develop the thinking and behaviour necessary for anyone taking this seat. Through real-life examples, and stories featuring Paul McCartney, Kalahari bushmen, Robert Maxwell, camels, Buddhist parables, and the Boeing 737 Max, readers will see how chairing a board requires leadership competency of its own (distinct from being a director). See what skills differentiate mediocre chairs from a truly great ones. The Great Chair has take-home value—with practical checklists you can use—and a personal development roadmap for you to develop the key skills central to effectively engaging individuals and groups. If you are on a personal journey that may include becoming a board chair—whether the organization exists for profit, and whether it is corporate, family, venture, public agency, or charity in form—The Great Chair was written for you. *Chanute Air Force Base (AFB) Closure, Rantoul* Springer Special edition of the Federal register, containing a codification of documents of general applicability and future effect as of April 1 ... with ancillaries.

Model Rules of Professional Conduct DIANE Publishing Controversy over the Iranian nuclear policy has been mounting in both legal and political circles since the early 2000s. Most recently, the IAEA, tasked with verifying compliance of Member States with the NPT, has been expressing concern that Iran's nuclear efforts are directed not solely at peaceful uses but also at military purposes. In response, various States have tried, individually and collectively, to engage Iran in agreed frameworks of action that would include an Iranian self-imposed restraint regarding its nuclear development. This volume documents the Iranian nuclear issue, tracing the evolution of international interest and concern with Iran's nuclear policy since the 1970s, when Iran began earnest efforts to acquire nuclear capabilities. Emphasis is placed on events since 2002-2003, when it was established that Iran had concealed certain aspects of its nuclear activities from IAEA. Alongside reports of the IAEA and Security Council documents, the volume covers diverse sources rather than relying solely on UN organs and agencies, international organisations or dedicated ad hoc bodies.
