Over the past two decades, the church has sought to incorporate technology into its worship services in ways that mimic modern society; professional audio consoles, stage lighting, projection screens, and theatrical sets are now customary. Because how people experience sacred space forms their views about it, what technical artists do in practice also shapes the congregation's beliefs about God. This book is the first exegetical discourse aimed at establishing a theology of church technical arts, and examining how a biblically informed theological understanding might help better shape praxis for contemporary church technical artists. The tabernacle construction narrative (Exodus 35:30-36:1), Christ's mediation from within the church (Hebrews 2:12-13), and Paul's exhortation to sing psalms, hymns, and spiritual songs (Colossians 3:16) are viewed in light of current practice to form a portrait of the technical artist, establishing that those who serve their local church through the audio, video, and lighting ministries are "producing worship."
