Cisco TelePresence™ Systems (CTS) create live, face-to-face meeting experiences, providing a breakthrough virtual conferencing and collaboration experience that transcends anything previously achievable by videoconferencing. Although the business case for deploying CTS is compelling, implementing it requires advanced knowledge of the latest networking technologies, an attention to detail, and thorough planning. In this book, four leading CTS technical experts cover everything you need to know to successfully design and deploy CTS in your environment. The authors cover every element of a working CTS solution: video, audio, signaling protocols and call processing, LAN and WAN design, multipoint, security, inter-company connectivity, and much more. They deliver start-to-finish coverage of CTS design for superior availability, QoS support, and security in converged networks. They also present the first chapter-length design guide of its kind detailing the room requirements and recommendations for lighting, acoustics, and ambience within various types of TelePresence rooms. Cisco Telepresence Fundamentals is an indispensable resource for all technical professionals tasked with deploying CTS, including netadmins, sysadmins, audio/video specialists, VoIP specialists, and operations staff. This is the only book that: Introduces every component of a

complete CTS solution and shows how they work together Walks through connecting CTS in real-world environments Demonstrates how to secure virtual meetings using Cisco firewalls and security protocols Includes a full chapter on effective TelePresence room design Walks through every aspect of SIP call signaling design, including both single-cluster and intercluster examples for use in a TelePresence environment Provides prequalification, room, and network path assessment considerations to help you anticipate and avoid problems Tim Szigeti, CCIE® No. 9794, technical leader within the Cisco® Enterprise Systems Engineering team, is responsible for defining Cisco TelePresence network deployment best practices. He also coauthored the Cisco Press book End-to-End QoS Network Design. Kevin McMenamy, senior manager of technical marketing in the Cisco TelePresence Systems Business Unit, has spent the past nine years at Cisco supporting IP videoconferencing, video telephony, and unified communications. Roland Saville, technical leader for the Cisco Enterprise Systems Engineering team, tests and develops best-practice design guides for Cisco TelePresence enterprise deployments. Alan Glowacki is a Cisco technical marketing engineer responsible for supporting Cisco TelePresence customers and sales teams. Use Cisco TelePresence Systems (CTS) to enhance global teamwork and collaboration, both within your own enterprise and with your customers, partners, and vendors Understand how the various components of the Cisco TelePresence Solution connect and work together Integrate CTS into existing LAN, enterprise, and service provider networks Successfully design and deploy a global TelePresence network Understand the importance of room dimensions, acoustics, lighting, and ambience and how to properly design the physical room environment Provide the high levels of network availability CTS requires Leverage the Cisco quality of service (QoS) tools most relevant to CTS network provisioning and deployment Systematically secure CTS using TLS, dTLS, sRTP, SSH, and Cisco firewalls This book is part of the Cisco Press® Fundamentals Series. Books in this series introduce networking professionals to new networking technologies, covering network topologies, sample deployment concepts, protocols, and management techniques. Category: IP Communications Covers: Cisco TelePresence Systems

This volume constitutes the proceedings of the 16 Collaboration Researchers' International Working Group (CRIWG 2010) Conference on Collaboration and Technology.

The conference was held in Maastricht, The Netherlands. The previous ten CRIWG conferences were organized in Madeira, Portugal (2000), Daxi, Germany (2001), La Serena, Chile (2002), Autrans, France (2003), San Carlos, Costa Rica (2004), Port de Galinhas, Brazil (2005), Medina del Campo, Spain (2006), Bariloche, Argentina (2007), Omaha NE, USA (2008), and Pesoda Regua, Douro, Portugal (2009). CRIWG conferences follow a simple recipe for success: good papers, a relatively small number of attendees, extensive time for lively and constructive discussions, and a high level of cooperation both within and between paper sessions. CRIWG 2010 continued this tradition. This 16 CRIWG exemplified the continuing interest in the groupware - search area. Papers were reviewed by at least three members of an internationally renowned Program Committee, using a double-blind reviewing process. Based on the reviewers' recommendations 27 papers were finally accepted: 18 long - papers presenting mature work, and 9 short papers describing work in progress. The accepted papers were grouped into seven themes that represent current - areas of interest in groupware research: Knowledge Elicitation, Construction and Structuring, Collaboration and Decision Making, Collaborative Development, Awareness, Support for Groupware Design, Social Networking and Mobile Collaboration. In addition, we featured a paper describing the history of CRIWG research. We were further very pleased to have Jay Nunamaker, Director of the Center for Management of Information at the University of Arizona, USA, a renowned specialist in group support systems as keynote speaker.

A major investment in professional development is necessary to ensure the fundamental success of instructors in technology-integrated classrooms and in online courses. However, while traditional models of professional development rely on face-to-face instruction, online methods are also gaining traction-viable means for faculty development. Virtual Mentoring for Teachers: Online Professional Development Practices offers peer-reviewed essays and research reports contributed by an array of scholars and practitioners in the field of instructional technology and online education. It is organized around two primary themes: professional development models for faculty in online environments and understanding e-Learning and best practices in teaching and learning in online environments. The objective of this scholarship is to highlight research-based online professional development programs and best practices models that have been shown to enhance effective teaching and learning in a variety of environments.
