Its basic empirical research and investigation of pure theories of investment in the sports and lottery markets make this volume a winner. These markets are simpler to study than traditional financial markets, and their expected values and outcomes are uncomplicated. By means of new overviews of scholarship on the industry side of racetrack and other betting markets to betting exchanges and market efficiencies, contributors consider a variety of sports in countries around the world. The result is not only superior information about market forecasting, but macro- and micro-analyses that are relevant to other markets. * Easily studied sports markets reveal features relevant for more complex traditional financial markets * Significant coverage of sports from racing to jai alai * New studies of betting exchanges and Internet wagering markets

The intriguing story and turbulent history of a paper Charles Dickens praised for its 'range of information and profundity of knowledge', and which Queen Elizabeth, the Queen Mother, simply endorsed with the remark: 'Of course I read *The Sporting Life*'. It was the Queen Mother's love of horseracing that made her such an avid reader of the *Life* and coverage of that sport forms the core of this book, but there is so much more to fascinate the reader including eyewitness accounts of the first fight for the heavyweight championship of the world and Captain Webb's heroic Channel swim of 1875. Highlights in the history of cricket, football and rugby are also featured, while chapters on coursing and greyhound racing rank alongside surreal reports on rapping contests and songbird singing competitions. And for 30 years Tommy Wisdom made his motoring reports unique by competing against the best at Brooklands, Le Mans and in many

Monte Carlo rallies, while Henry Longhurst's golfing column was simply the best. The paper's strident campaigns for racing reforms are also chronicled along with its coverage of major news stories, from Fred Archer's shocking suicide to its own untimely demise. Its travails in the law courts are documented from its first year, when it was forced to change its title, to its last, when it had to pay libel damages to the training team of Lynda and Jack Ramsden and their jockey, Kieren Fallon. A higher price was paid by its French correspondent who was killed in a duel over an article he had written, while the terrible toll the First World War took on the nation's sporting heroes is catalogued by the *Life*'s embedded army correspondent, against a background of political bungling that is being repeated today.

"Mum, where is Dad, has he gone to bed?" I didn't know where my dad had gone because he just disappeared. I should really have got used to my dad getting drunk because he seemed to spend a lot of time drinking. But when I think about it, his

drunkenness didn't bother me too much: it was the punching of my mum and myself that hurt me the most. However, I did find time to have fun with a couple of friends that I had. The secret agent games that I invented from time to time coincided with the true-life games and excitement that I found along the way.

Annual Review in Automatic Programming focuses on the techniques of automatic programming used with digital computers. Topics covered range from the design of machine-independent programming languages to the use of recursive procedures in ALGOL 60. A multi-pass translation scheme for ALGOL 60 is described, along with some commercial source languages. The structure and use of the syntax-directed compiler is also considered. Comprised of 12 chapters, this volume begins with a discussion on the basic ideas involved in the description of a computing process as a program for a computer, expressed in a formal symbolic language such as ALGOL 60. The emphasis is on the information conveyed by the program constituents (semantics), rather than the particular form used (syntax).

Subsequent chapters focus on generalized ALGOL; the design of machine-independent programming languages; JOVIAL, a programming language for real-time command systems; and a complete ALGOL translator, expressed in ALGOL itself. A detailed description of the compiler compiler is also presented, together with the Rapidwrite program. The final chapter is devoted to file processing in SEAL (Standard Electronic Accounting Language). This monograph will be of interest to computer programmers.

Advertising and the Law Taylor & Francis

Using a rich variety of historical sources, Suzanne Morton traces the history of gambling regulation in five Canadian provinces - Nova Scotia, Quebec, Ontario, Manitoba, and B.C. - from the First World War to the federal legalization in 1969. This regulatory legislation, designed to control gambling, ended a long period of paradox and pretence during which gambling was common, but still illegal. Morton skilfully shows the relationship between gambling and the wider social mores of the time, as evinced by labour, governance, and the regulation of 'vice.' Her focus on the ways in which race, class, and gender structured the meaning of gambling underpins and illuminates the historical data she presents. She shows, for example, as "Old Canada" (the Protestant, Anglo-Celtic establishment) declined in influence, gambling took on a less deviant connotation - a process that continued as charity became secularized and gambling became a lucrative fundraising activity eventually linked to the welfare state. At Odds is the first Canadian historical examination of gambling, a complex topic which is still met by moral ambivalence, legal proscription, and volatile opinion. This highly original study will be of interest to the undergraduate history or social science student, but will also hold the attention of a more general reader.

I was born in 1947 to a mother from Barnsley and a father from Essex. I have 3 great loves in my life: Barnsley FC, Yorkshire County Cricket Club and my wonderful wife. My wife is my rock; Yorkshire CCC are my summertime passion; the Super Reds break my heart year after year- but I wouldn't swap them for any other team in the world. I have tried to look at the world of business through the gaze of a mixture of reality, humour and, on occasions, sheer disbelief. Every word and every event documented is the absolute truth. If you enjoy reading this book

half as much as I enjoyed writing it, then I will have achieved more than I could ever have hoped for.

The Routledge Handbook of Sports Journalism is a comprehensive and in-depth survey of the fast-moving and multifaceted world of sports journalism. Encompassing historical and contemporary analysis, and case studies exploring best practice as well as cutting edge themes and issues, the book also represents an impassioned defence of the skill and art of the trained journalist in an era of unmediated digital commentary. With contributions from leading sports-media scholars and practising journalists, the book examines journalism across print, broadcast and digital media, exploring the everyday reality of working as a contemporary reporter, editor or sub-editor. It considers the organisations that shape output, from PR departments to press agencies, as well as the socio-political themes that influence both content and process, such as identity, race and gender. The book also includes interviews with, and biographies of, well-known journalists, as well as case studies looking at the way that some of the biggest names in world sport, from Lance Armstrong to Caster Semenya, have been reported. This is essential reading for all students, researchers and professionals working in sports journalism, sports broadcasting, sports marketing and management, or the sociology or history of sport.

This book explores the key issues of racism, anti-racism and identity in British football. It relates the history of black players in the game, analyses the racism they have experienced, and evaluates the efficacy of anti-racist campaigns. The efficacy of the policing of racism is also assessed. The nationalism and xenophobia evident in much of the media's coverage of major tournaments is highlighted in the context of the way that English, Scottish and Welsh identities are constructed within British football.

INTERNATIONAL JOURNAL OF FORECASTING Troubador Publishing Ltd

The joy of finding an old box in the attic filled with postcards, invitations, theater programs, laundry lists, and pay stubs is discovering the stories hidden within them. The paper trails of our lives -- or ephemera -- may hold sentimental value, reminding us of great grandparents. They chronicle social history. They can be valuable as collectibles or antiques. But the greatest pleasure is that these ordinary documents can reconstruct with uncanny immediacy the drama of day-to-day life. The Encyclopedia of Ephemera is the first work of its kind, providing an unparalleled sourcebook with over 400 entries that cover all aspects of everyday documents and artifacts, from bookmarks to birth certificates to lighthouse dues papers. Continuing a tradition that started in the Victorian era, when disposable paper items such as

trade cards, die-cuts and greeting cards were accumulated to paste into scrap books, expert Maurice Rickards has compiled an enormous range of paper collectibles from the obscure to the commonplace. His artifacts come from around the world and include such throw-away items as cigarette packs and crate labels as well as the ubiquitous faxes, parking tickets, and phone cards of daily life. As this major new reference shows, simple slips of paper can speak volumes about status, taste, customs, and taboos, revealing the very roots of popular culture.
