Easy Monday Crosswords Routledge Classic Books Library presents this brand new edition of "The Federalist Papers", a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. "The Federalist", as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyse the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755-1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1799-1800 and founded the Federalist Party, the system that governed the nation's finances. His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the United States.

The Moral Dimension of Judicial Decision DIANE Publishing

This guide provides analyses of curriculum materials that have been designed for teaching about the U.S. Constitution and law-related education. The guide begins with an editor's introduction and two essays, "Constitution Study and Civic Education" (James B. Giese) and "Thinking about Law-Related Education during the Bicentennial" (Barbara Miller). The resource reviews are presented in three sections. Forty-three reviews of print-based materials for elementary (K-6) Constitution and law-related education are provided in section 1. The second section contains 86 print-based materials for secondary (7-12) classrooms. Simulations, games, filmstrips, cassettes, videotapes, software, and audiocassettes are reviewed in the third section. Each review includes:

(1) author, publisher, cost, subject area, and intended users; (2) content description; (3) primary teaching procedures; and (4) critical evaluation of the materials. Following the reviews are annotated lists of 64 additional materials; they include: (1) an annotated bibliography of children's literature that can be used to teach law; (2) a list of constitution-related literature; (3) a list of constitution-related bibliographies and catalogs; and (4) a list of films with constitutional content. Four indexes and a complete list of publishers' addresses is provided at the end of the book. (SM)

Things Social Studies

'The Museum of Bioprospecting, Intellectual Property, and the Public Domain' addresses one of the most heated policy debates of our day: access to genetic resources and the fair and equitable sharing of benefits. Seven scholars - an anthropologist, an economist, a sociologist, and four lawyers - discuss how a museum can flesh out the relevant ethical issues that frustrate any purely technical solution. The visitors to the proposed museum become a source of considered judgments. Commercial movies are screened and discussion follows about some aspect of bioprospecting, intellectual property, and the public domain, suggested in the films. Both the screenings and discussions occur in small amphitheatres named according to the uneven chronology in the management of information: 100,00 BC to 16 September 1787 (public domain); 17 September 1787 to today's date (intellectual property); and today's date to (?) (legislation sui generis). The three amphitheatres surround a courtyard café which is a metaphor for the mission of the museum: conversation. The scholars vet the blueprint before an imaginary octogenarian who is not at all impressed and will "say the damndest things." As this 21st century Don Quixote moseys

across the chapters and pokes fun at the scholarly ruminations, the reader begins to understand how the proposed museum is indeed a forum for the nuanced ethics over bioprospecting, intellectual property, and the public domain. The dialogue-within-a-dialogue is highly original and entertaining.

While many recent observers have accused American judges—especially Supreme Court justices—of being too driven by politics and ideology, others have argued that judges are justified in using their positions to advance personal views. Advocating a different approach—one that eschews ideology but still values personal perspective—H. Jefferson Powell makes a compelling case for the centrality of individual conscience in constitutional decision making. Powell argues that almost every controversial decision has more than one constitutionally defensible resolution. In such cases, he goes on to contend, the language and ideals of the Constitution require judges to decide in good faith, exercising what Powell calls the constitutional virtues: candor, intellectual honesty, humility about the limits of constitutional adjudication, and willingness to admit that they do not have all the

answers. Constitutional Conscience concludes that the need for these qualities in judges—as well as lawyers and citizens—is implicit in our constitutional practices, and that without them judicial review would forfeit both its own integrity and the credibility of the courts themselves.
